Index for Volume 90

AUTHOR AND SUBJECT INDEX. Pages indicating errata are in italic. "S" indicates June abstract supplement. Publication number P-2000-1020-01O.

Abbas, H. K., S1, S9
Abdul-Kader, A. M., S65
Abdurahman, M. D., 537
Abney, T. S., S15
Abou-Ghanem, N., S88
Abou-Zeid, N. M., 1182
Abstracts, author index and division meeting presentations, S135
Abu-El Samen, F., S1
Acidovorax avenae
—on cucurbits, seed transmission, S126
—molecular characterization, 340
—strain diversity from cucurbits, DNA fingerprinting and fatty acid analysis, 191
—on watermelon, field movement in Texas, S38
Aconitum latent virus, on *Aconitum napellus*
—doubly infected with *Cucumber mosaic virus,* cover photo, April
—molecular characterization, 340
Acosta, J., S24
Acosta, L. I., S1
Adachi, Y., 1209, S47
Adair, R. C., S30
Adams, P. D., S2
Adaskaveg, J. E., 171, S2, S119, S121
Adee, E. A., 875
Adkins, S., S2, S22
Aegerter, B. J., S2
Agrobacterium spp.
—*A. tumefaciens:* detection in soil, S121; genomic analysis, S93; hydrogen peroxide detoxified by catalase, S86
—*A. vitis,* on grape, biocontrol enhanced by trifolitoxin, S35
Ahn, I. P., S42
Ahoonmanesh, A., 629
Ajwa, H. A., S102
Akimitsu, K., 762
Akingbe, O. O., 812
Akridge, J. R., S32, S65
Alabouvette, C., 1279
Al-Adawi, A. O., *928*
Alarcon-Chaidez, F., S81
Alavi, S., 699
Albana, J. L., S11
Albiach-Martí, M. R., 134, S2, S30, S69
Albino, M. M. C., S23
Alcantara, S., S123
Aldwinckle, H. S., 72, S56, S64, S65
Alessandro, R., S74
Alexander, H. M., 1181
Alexander, S. A., S132
Alfalfa
—bacterial root rot, regression analyses and variable disease intensity, yield, 657
—*S. enterica* mutants, sprout growth reduction, S13
Ali, G. S., S117
Ali, S., S2
Alkylresorcinol, disease resistance source in cereal grain, S65
Allan, M. A., S2
Allen, T. W., Jr., 88
Allen, C., S37
Allen, E., S111
Allen, R., S82
Alliot, B., 505
Alminaite, A., S39
Almond
—cold storage canker, etiology in California, S49
—*Colletotrichum* spp., molecular analyses, 608
—Phytophthora canker, chemical management, S10
Al-Subhi, A. M., *928*
Alternaria spp., on citrus, host specificity, population structure, 407
—*A. alternata:* on apple, detection with PCR method, 973; mycelial growth, monoterpene effect, S30; on persimmon, gibberellin treatment effect, 1256; on strawberry, infection-inhibiting factor, 595; on tangerine, *AKT* homologs, 762; on tobacco, resistance and riboflavin, 801
Alvarez, A. M., S3, S47, S71
Alvarez, E., S2, S3
Alzate-Marin, A. L., 758
Ambruzs, B. D., S117
American Phytopathological Society
—abstracts, author index, S135
—annual and division meeting presentations, author index, S135
—annual meeting abstracts, S1
—annual report, 15
—excellence in extension award, 27
—fellows, 22
—Lee M. Hutchins award, 28
—Novartis award, 29
—officers, representatives, and committees, 13
—presidential address, 17
—Ruth Allen award, 30
Ames, K. A., S3
Ammermann, E., S3
Anandalakshmni, R., S127
Andersen, P. C., S54
Anderson, J. A., 699, 812
Anderson, M. G., S131
Anderson, N. A., S73
Anderson, O., S57
Anderson, R. L., S97
Anderson, T. E., S134
Andrews, D. L., S28
Andries, C., S86
Angell, S., S112
Anziani, C., 730
Aparicio, F., 1330
Apel-Birkhold, P. C., 699, 812, S4
Aphanomyces spp.
—*A. cochlioides:* spore production, variability, S9; on sugar beet, genetic diversity, letter to editor, 565
—*A. euteiches,* detection, PCR-based assay, 1137
Aphis gossypii, vector for *Cucumber mosaic virus,* satellite RNA effect, 1068
Apple
—Alternaria blotch, detection with PCR method, 973
—arthropod and pathogen management, leaf litter and urea effect, S29
—*Botrytis cinerea,* calcium inhibitory to, 769
—fire blight: benzothiadiazole derivative effect on, S49; environmental factors, 1285; integrated control, S64; resistance inheritance, S56
—postharvest decay, biocontrol and heat treatment combination, S46
—replant disease, wheat cultivation effect, 114
—replant soil, microbial management, S102
—resistance and DNA technologies, S109
—scab: biocontrol, 31; races 6 and 7 of *Venturia inaequalis,* host-pathogen genetics, 236; resistance and endochitinase from *Trichoderma,* 72
—shoot blight, prohexadione calcium effect, S35
—sooty blotch, temperature and relative humidity effect, 362
Apple chlorotic leaf spot virus
—*on Nicotiana occidentalis, Grapevine berry inner necrosis virus* resistance, 311
—on transgenic *Nicotiana occidentalis,* cover photo, March
Apple mosaic virus, detection with molecular hybridization and polymerase chain reaction, 1330
Arabidopsis sp.: hypersensitivity and defense, cell death pathway, S40; powdery mildew, systemic acquired resistance, S63
—*A. thaliana:* diseases of, riboflavin effect, 801; Fusarium wilt, host-pathogen interaction model, S54; resistance gene RPS2, interacting proteins, S33; *Turnip yellow mosaic* and *Tobacco mosaic viruses,* seed transmission, 1233
Aragão, F. J. L., S23
Archer, C., S85
Ardales, E., S108
Arlat, M., S93
Armillaria spp.: matings, assessment techniques, S42; in Ozark forests, harvest disturbance, S10
—*A. tabescens,* rhizomorph generation, moisture and oxygen effect, S11
array, S8
Arnold, J., S87
Arseniuk, E., S6, S17
Arthrobotrys haptotyla, nematode parasite, use in biocontrol, 498
Artiguenave, F., S93
Arul, J., S51
Aryantha, I. P., 775
Ash, anthracnose, variation in susceptibility, S38
Ashfield, T., S110
Aspergillus spp.: aflatoxin biosynthesis, S96; section Flavi, aflatoxins in shrubs and tress, S8; US and African strain comparison, aflatoxin, S11
—*A. flavus:* aflatoxin biosynthesis, gene expression, S56; aflatoxin detection, kojic acid, S80; on corn, ear rot and aflatoxin production, resistance, 292; interaction with *Fusarium verticillioides* and insects, in corn, in Africa, 276; pectinase activity, isolates in southern USA, S52
Assemat, P., S57
Assis Filho, F. M., S125
Astua-Monge, G., S110
Atabekov, J. G., S111
Atia, M., S22
Attias, M., 1032
Avantaggiato, G., S40
Avila-Adame, C., S3
Avocado, *Colletotrichum gloeosporioides,* unripe fruit infection, 553
Aycock, R., 564
Ayllón, M. A., S3, S30, S67
Aylor, D. E., 78, S50

Baayen, R. P., 867, 891
Babadoost, M., S3, S131
Bacillus spp.
—*B. cereus,* on alfalfa, regression analyses, variable disease intensity, 657
—*B. mojavensis,* biocontrol agent, host range, S4
—*B. subtilis,* biofungicide from, mechanism, S87
Bacon, C. W., S4, S27
Bacteria
—antibiotic resistance, mechanisms, S100
—pathogen genomics, S92
—plant association, genomic analysis, S93
—plant recognition, oxygen uptake response, S4
—population composition, biofilm effect, S101
—soil, functional diversity, S133
Bactericides, tomato bacterial canker, disease and yield effects, 38
Badel, J. L., S4, S24
Badgley, A. K., S66

Bai, G., S4
Bai, J., S4
Baider, A., 1105
Bailey, B. A., 691, 699, 812, S4
Bailey, C., S132
Bajt, S., S37
Baker, C. J., S4, S65
Balaban, M. O., S113
Balardin, C. R., S4
Balardin, R. S., S4
Balasubramanian, S., S5, S88
Baldridge, G. D., S35
Baldwin, M., S132
Ballester-Olmos, J. F., 134
Banana
—Panama disease, race 4 resistance, 1173
—Septoria leaf spot, identification, 884
Banana streak virus, genetic diversity, Australian isolates, 921, *1295*
Bananej, K., 629
Banks, D., S13
Banksia spinulosa, Phytophthora cinnamomi on, suppression by composted manure, 775
Bannwart, D. L., S30
Barak, J. D., S5
Barash, I., S22
Barbe, V., S93
Barber, K. L., S3
Barbieri, L., S30
Bardinelli, T. R., S5, S53
Barker, I., 448, S43
Barley
—basal kernel blight, control with *Pseudomonas syringae* and *Pantoea* spp., 368
—Fusarium head blight, quantitative trait loci, mapping and resistance, 1079
—leaf blotch, genetic structure of field populations, 901
—leaf rust, resistance genetics, 1131
—loose smut, carboxin resistance, 179
—plant virus survey, in Alaska, S66
—polymerase, RNA-directed, characterization, S36
—powdery mildew, seed treatment with *Chaetomium,* S64
—scald, histopathology, resistance, 94
Barley yellow dwarf virus
—serotypes, analysis and modeling, 860
—survey in Virginia, S133
—translation event and long-distance control, S111
—in wheat, yield effects, 1043
Barnes, I., S5
Barnes, J. S., S5, S53
Barnett, J. P., S81
Barrault, G., 915
Barros, T. S. L., S5
Barry, J., S111
Bartnicki-Garcia, S., S121
Barton, W. R., S5, S28
Bartz, J. A., S7
Barzuna, L., 615
Basaran, P., S11
Basil, Fusarium wilt, airborne conidia, 1322
Basim, E., S5, S6
Basim, H., S5, S6
Basinger, E., S87
Basnayake, M. D. V. R., S6, S131
Batten, J. S., S6
Batut, J., S92
Batzer, J. C., S27
Bauer, D. W., S65
Bauer, W. D., 327
Baulcombe, D. C., S112
Baum, T. J., S82
Bean (see also *Phaseolus vulgaris*)
—root rot, bacterial seed treatment, S22
—snap, ozone effect in New York, S133
—white mold, plant arrangement effect, S61
Bean common mosaic virus
—*bean common mosaic necrotic virus* comparison, molecular analysis, S24
—resistance genetics, S110
Bean dwarf mosaic virus, hypersensitivity and mapping, S87
Bean golden mosaic virus
—golden mosaic disease difference, in Puerto Rico, S122
—resistance with mutant *rep* gene, S23
Bean golden yellow mosaic virus, pseudorecombination with other viruses, germ plasm screening, 1224
Bean pod mottle virus
—isolate diversity, cross-protection, S31
—on soybean, in South Dakota, S45
Bean, T. G., S6
Bean yellow mosaic virus, Clover yellow vein virus cross-protection, S68
Becherer, H. E., S10
Beck, J. J., S60
Becker, J. O., 401, S8, S117, S119, S120
Becker, R., S5, S53
Becton, C. M., S68
Bedford, I. D., S9
Been, T. H., 647
Beer, S. V., 801
Beet chlorosis virus, on beet, variability, 460
Beet curly top virus, capsid protein role, virus movement and insect transmission, S74
Beet mild yellowing virus and *Beet western yellows virus,* on sugar beet, variability, 460
Beet yellows virus, cell-to-cell movement, S91
Bekal, S., S117
Bell, J., 38
Bell, M. L., S127
Bemisia tabaci, Watermelon chlorotic stunt virus vector, Sudan and Iran, 629
Bénaouf, G., 236
Ben-Arie, R., 1256
Bender, C. L., S23, S41, S59, S63, S81, S88
Bender, D. A., S70
Benhamou, N., 45, 932
Bennett, R. S., S6
Beno-Moualem, D., 553
Benson, D. M., S36, S126
Bent, A. F., s33, S40, S110
Bentgrass, dollar spot, nitrogen, mowing, and fungicides, S19
Bentley, E. M., S117
Ben-Yehuda, P., 601
Berestecky, J., S3
Berg, M., S6, S63
Berger, R. D., S128
Berges, R., 1145
Bergstrom, G. C., S6
Berka, R., S57
Bermuda grass etched-line virus, Iranian isolate, cloning and sequencing, S38
Bermudagrass, dematiaceous fungi, waste application sites, Mississippi, S61
Bernal, J. J., 1098
Bernhard, F., S6
Bernier, J., 31
Bernier, L., S21
Berrie, A. M., 1367
Berry, J. A., S112
Berthier-Schaad, Y., 951
Bertrand, P. F., S9
Berube, J. A., S73
Beyer, D. M., S6, S38, S131
Beyl, C. A., S35, S58
Bhaskara Reddy, M. V., S64
Bhat, R. G., S7
Bhatnagar, D., S107
Bijman, V. P., S54, S120
Billau, A., S93
Biological control
—AQ10 biofungicide, case study, S101
—*Arthrobotrys* and *Hirsutella* spp. for nematodes, 498
—*Dendryphion penicillatum* and *Pleospora papaveracea,* on poppy, mycoherbicides, 691
—*Fusarium* for *Pleospora papaveracea,* on poppy, 812
—grapefruit postharvest decay, antagonist dynamics, 1217
—*Pantoea agglomerans* and *Trichoderma hamatum* for radish bacterial leaf spot, 327
—in parthenium, management in India, S61
—*Penicillium oxalicum* for *Fusarium oxysporum* on tomato, 260
—phyllosphere, Serenade, S101
—postharvest disease on fruits, mechanism, 1196
—potting mixes for *Phytophthora cinnamomi,* 775
—*Pseudomonas syringae* and *Pantoea agglomerans* for barley basal kernel blight, 368
—*Pythium* on cucumber, suppressive microflora, 125
—*Pythium ultimum* on roots, disease progression using rhizobox, 1049
—screening methods, comparison of, S50
—*Serratia plymuthica* for *Pythium* on cucumber, 45
—*Stenotrophomonas maltophilia* for *Bipolaris sorokiniana,* chitinase role, 384
—tomato and pepper diseases, chemical control comparison, S85
—*Trichoderma virens* for *Rhizoctonia solani,* on cotton, 248
Biotechnology
—bacteria, genes, genomes, S109
—food safety, S104
—GM foods controversy, S104
—health and economic development, future in Third World, S95
—industry perspective, S94
—pathogen detection and disease diagnosis, S109
—plant virus research, S123
—transgenes from biocontrol microbes, S109
—transgenic trees, S105
—world wheat trade, S104
Bipolaris sorokiniana, on tall fescue, control by *Stenotrophomonas maltophilia,* chitinase role, 384
Bird, J., S122, S122
Birkes, D. S., S27
Bishop, D. G., S58
Bishop-Hurley, S. L., S7
Bissonnett, S. M., S112
Blacharski, R. W., S7
Blachere, F. M., S7
Blake, D. R., S102
Blakeslee, G., S104
Blanchette, R. A., S7, S34, S40, S73
Blattner, F. R., S92
Blechl, A., S57
Bliss, W., 615
Blodgett, J. T., S7
Blok, W. J., 253
Blom, T. J., S30
Blueberry
—*Monilinia vaccinii-corymbosi,* phenology, 390
—scorch disease, virus transmission, cultivars, and yield, 474
—surfactant injury, diagnosis in North Carolina, S15
Blueberry red ringspot virus, genome organization and sequence analysis, S27
Blueberry scorch virus
—on highbush blueberry, transmission, cultivars, and yield, 474
—oak-leaf line pattern on blueberry, cover photo, May
Bo, L., S8
Boehm, E. W., S8

Boehm, M. J., S33, S42, S69
Boge, W. L., 1137
Boisne-Noc, R., s18
Bolar, J. P., 72
Bollen, G. J., 253
Bonacci, B. B., S33
Bonants, P. J. M., 867, 891
Bonde, M. R., 951, S25, S131
Bonello, P., S8
Bonierbale, M., S68
Boonham, N., 448, S43
Borejsza-Wysocka, E. E., S56, S65
Borneman, J., S8
Bosmans, R. V., S106
Bosque-Pérez, N. A., 276
Bost, S. C., S84
Bostanian, N. J., S5
Bostick, J. P., S8
Bostock, R. M., S49
Botha, W. J., S69
Bothe, G., S92
Botryosphaeria dothidea
—iprodione resistance, S49
—on pistachio, latent infection, S56
Botrytis spp.
—*B. cinerea:* on apple, calcium inhibitory effect, 769; on carrot, resistance induced in storage, 981; dicarboximide resistance, 1246; fungicide resistance, genetic analysis, 851; on strawberry flowers, modeling infection, 1367
—*B. fabae,* on faba bean, biocontrol in Egypt, 1182
Boucher, C., S9
Boureau, T., S101
Bourgeois, G., 1120
Bowden, R. L., S40
Bowen, K. L., S8, S11
Bowers, J. H., S8
Bowman, N. D., S112
Boyd, M. L., S8
Boydston, C. M., S19
Boyette, C. D., S1, S9, S98
Brantner, J. R., S9
Brassica napus, Leptosphaeria maculans, pathosystem, resistance sources and durability, field evaluation, 961
Brassica yellowing virus, on rape, variability, 460
Braun-Kiewnick, A., 368
Bremia lactucae, on lettuce
—spore release, factors, 67
—survival factors, 827
Brener, S., 834
Brenneman, T. B., S9, S125
Briddon, R. W., S9
Brigneti, G., S112
Brill, W., S113
Bristow, P. R., 474, S9, S117
Britton, K. O., S39
Brlansky, R. H., S9, S36
Broad bean wilt virus, on pepper, 1390; cover photo, December
Brodeur, J., 932
Brome mosaic virus, plant guttation effect, S19
Brooks, W. S., 1131
Brottier, P., S93
Brown, A., S73
Brown, C. R., S118
Brown, E. A., S112
Brown, J. K., 546, S10, S37, S122
Brown, J. K. M., 320
Brown, M., S60
Brown, R. L., S14, S27
Brown, S. E., S93
Brown, S. K., S56
Brown, S. L., S83, S99
Brown, W., S30
Brown, W. Y., S105
Browne, G. T., S10, S83
Browning, J. A., 676
Bruckart, W. L., S10, S87
Bruhn, J. N., S10, S11
Brun, H., 961
Bruton, B. D., S18, S24, S63, S101, S123
Bryan, T. G., S110
Büche, C., S67
Buchenauer, H., S22, S55
Buckler, E. S., S95
Bukhalid, R. A., S47, S66
Bull, C. T., S15, S72, S102
Burch, K. B, S8, S11
Burdon, J. J., 901
Burkholderia spp.
—*B. cepacia,* on onion, watersoaking and porin protein gene, S51
—*B. vietnamiensis,* antibiotic production, genetics, S34
Burland, V., S92
Burnett, P. A., 94
Burnside, J., S6, S131
Burpee, L. L., S96
Burr, H. N., S85
Burr, J. A., S85
Burr, T. J., S11
Bush, J., S20, S34, S70
Bushnell, W. R., S35
Bushong, P. M., S125
Busto, J., S92
Butrón, A., S32
Butterfield, E. J., S28, S74
Butternut, canker, metabolite toxicity of *Sirococcus* sp., S74
Butterworth, S. C., S11
Buyer, J. S., S65, S133

Cabrera, O., 977
Caciagli, P., 629
Cahn, M. D., S68, S121
Cambra, M., 1337
Campbell, C. L., S21
Campbell, L., S51
Cançado, L. J., S23
Cancro, R., S11
Candresse, T., 522
Cantaloupe (see also Melon, Muskmelon): bacterial blight, genetic diversity, in France, 636
Capsicum spp.
—*C. annuum:* insects and bacteria, S124; Phytophthora blight, inoculum dispersal, dynamics, 148; RNA, *Broad bean wilt virus* effect, 1390; root-knot, biocontrol, S53; *Xanthomonas campestris,* races and necrosis, S74
—*C. chinense, Tobacco etch virus,* field spread in Jamaica, S50
Cardin, L., 522
Cardwell, K. F., 276, S11
Carey, W. A., S71
Carica papaya, viruses of, molecular study, S56
Carisse, O., 31, 1120
Carle, S. A., S11
Carlier, J., 884
Carling, D. E., S129
Carlisle, D. J., S12, S19
Carnation ringspot virus, capsid protein, mutation, S32
Carras, M. M., 1126, S77
Carrera, L. M., S12
Carrington, M. E., S124
Carris, L. M., 376
Carroll, B. R., S114
Carroll, J. E., S12
Carroll, R. B., S131
Carrot
—*Botrytis cinerea,* resistance induced in storage, 981
—root rot and seedling diseases, Georgia, S129
Carta, L., S53
Carter, Jr., S., S52
Carter, L., S51
Carter, S. A., S12
Cartwright, R. D., 1396, S1, S99
Cary, J., S107
Casper, H., S129
Cassava, bacterial blight, genetic diversity of bacteria in Colombia, 683
Catranis, C. M., S12, S46
Cattolico, L., S93
Cauliflower, Verticillium wilt
—broccoli-mediated reduction, mechanism, 305
—irrigation effect, 995
Cauliflower mosaic virus
—hypersensitivity and agroinfiltration, in tobacco, S41
—translation strategy, bakers' yeast, S111
Cavaletto, J. R., S29
Celebi-Toprak, F., S12
Celmer, A. F., S4
Cenococcum geophilum, in serpentine soils, diversity, S71
Cephalosporium maydis, on corn, diversity in Egypt, S68
Ceratocystis spp.
—*C. fagacearum,* on oak, *Gliocladium roseum* for control, S55
—*C. fimbriata,* on almond, topical treatments, S29
Cercospora spp.
—*C. kikuchii,* polyketide synthase, S79
—*C. zeae-maydis:* on corn, African and US populations, genetic relatedness, 486; on corn, resistance and trait loci, 1018; on corn, rRNA genes, S134
Cereal, rusts, variation and resistance breeding, S94
Cerkauskas, R. F., S12
Cha, J.-S., S13
Cha, S. H., S39
Chagas, J. M., 758
Chakraborty, S., S83
Chambers, J., S94
Champaco, E. R., S31
Champoiseau, P., S18
Chandler, C. K., S46
Chang, C. J., S13
Chang, P. K., S107
Chang, S., S13
Chapman, S. R., S38
Chappelka, A. H., S22
Chappell, C., S65
Chardonnet, C. O., 769
Charkowski, A., S13
Charlton, N. D., S13, S81
Charter, E. A., S26
Chase, T. E., S13
Chastagner, G. A, S117
Chayote mosaic virus, on Cucurbitaceae, new tymovirus, 1098
Chellemi, D. O., 1079, S102
Chen, J., S13
Chen, M. H., 94
Chen, S. Y., S14
Chen, W., 875, S37, S52
Chen, X. M., S14
Chen, X., S54
Chen, Y. F., S13
Chen, Z.-Y., S14
Chenault, K. D., S14
Chenopodium quinoa, downy mildew, in Peru, S17
Cherry
—early brown rot, *Monilinia*-specific DNA primers, 171
—little cherry disease viral agent association, S67
Cherry necrotic mottle virus, nucleotide sequence, S67

Chestnut, blight, vegetative compatibility types, hypovirulence and biocontrol, in France, 730

—soil, methyl bromide alternatives, S102
—soil injection, emission reduction, S102
Fumigation, root-knot nematode, dichloropropene, S128
Funderburk, J. E., S26
Fungicides (general) (see also Fungicides, specific)
—acetates and salt effects on plant pathogenic fungi, S75
—Ascochyta blight of chickpea, postinfection applications, 834
—microbioassays for, in National Center for Natural Products Research, S83
—pathogen metabolite, disease control, S53
—pathogen resistance, regulatory aspects, S100
—postharvest decay, stone fruit crops, preharvest, S2
—potato late blight, mating type and changes induced by fungicides, 1201
—registration update, minor-use, S77
—resistance: management strategies, S100; population aspect, S100; selection pressure and dose heterogeneity, model, 333
—roses, foliar diseases and resistance, S65
Fungicides (specific) (see also Fungicides, general)
—BAS 500 F: broad-spectrum, fruit, vegetable, and field crops, S5; field crop application, S38
—carboxin, *Ustilago nuda* resistance gene, 179
—dicarboximide, *Botrytis cinerea* resistant to, fitness, 1246
—lysozyme, from chicken egg white, effect on fungi, S26
—mefenoxam, *Phytophthora capsici* insensitive to, 396
—Sovran: apple IPM program, S5; performance and management, S130; performance and management guidelines, S134
—strobilurin: biological characterization, S74; broad-spectrum, S3; properties and performance, S28; turfgrass disease control, broad-

spectrum, S53
—thiophanate-methyl and vinclozolin, *Botrytis cinerea* sensitivity, genetic analysis, 851
Furman, L. A., S26
Fusarium spp.: on faba bean and *Orobanche* sp., metabolite toxicity, S32; genomics, germ plasm conservation, S96; on melon, fruit rot, S24; populations distinguished with AFLP, S46
—*F. avenaceum*, on lisianthus, airborne dispersal, sampler method, S128
—*F. culmorum*, on wheat, antifungal activity of extracts, 666
—*F. equiseti*, trichothecene from, nematode antagonism, S56
—*F. graminearum:* on barley, quantitative trait loci, 1079; on wheat, protein constructs, suspension cell assay, S35; on wheat, situation in Iran, 103; on wheat, survival and inoculum in residue, S60
—*F. moniliforme*, fungicide, growth effect, S87
—*F. oxysporum:* on banana, race 4 resistance, 1173; on basal, seed treatment, S2; on chickpea, epidemics and yield loss, 1269; gene genealogies and AFLP analyses, complex, 891; on melon, *Impala* transposition, pathogenicity, 1279; on opium poppy, Nep1 protein, biocontrol, 812; in soil, control by organic amendments and tarping, 253; soil fumigation for, synergy of combinations, S119; soil treatments and solarization, 751; on sugar beet, biological seed treatment, S119; on tomato and basil, airborne conidia, 1322; on tomato, pseudomonad and benzothiadiazole effect, S22; transformation, pathogenicity gene tagging, S54; transformation, phytotoxic protein Nep1, S4
—*F. sambucinum*, on potato, inhibition by salt, S51
—*F. solani:* on caladium, fungicide and hot water treatment, S123; on soybean, detection by DNA and PCR, S46; on soybean, herbicide effect on glyphosate-tolerant plants, 57; on soybean, molecular differentiation, rDNA sequence, 491; on soybean, transmission, S4
—*F. subglutinans*, on longleaf pine seed and seedlings, losses, S71
—*F. verticillioides*, *Aspergillus flavus* and insect interaction, on corn, Africa, 276

Gabel, B. R., S110

Palumbo, J., S58
Pan, S. Q., S86
Panaccione, D. G., S44, S71, S96, S133
Panicum mosaic virus
—replicase-associated protein of, S6
—on St. Augustinegrass, genetic diversity, 977
Pantoea spp.
—*P. agglomerans:* biocontrol for barley basal kernel blight, 368; on pear and apple blossoms, environmental factors, 1285; radish bacterial leaf spot control, 327
—*P. stewartii,* on corn: flea beetle monitoring, S22; virulence control, S6
Pantuso, F. S., S26
Panwar, M. S., S84
Papaver somniferum
—*Dendryphion penicillatum* and *Pleospora papaveracea* as pathogens, infection process, 699
—Fusarium wilt, biocontrol with *Pleospora,* 812
—seedborne pathogens, *Dendryphion* and *Pleospora* spp. as mycoherbicides, 691
Papaya, virus resistance, socioeconomic effect in Hawaii, S29
Papaya mosaic virus, infectious clones, 35S promoter, S23
Papaya ringspot virus
—coat protein, analysis in transgenic papaya, S27
—coat protein segment, S14
—transgenic, S109
Papiernik, S., S102
Pappu, H. R., 139, S59, S125, S128
Pappu, S. S., S128

Park, S. Y., S40, S59
Parker, J. E., S40
Parks, R., S118
Parra, G. P., S65
Parra, G. R., 148
Parthenocissus quinquefolia, phytoplasma, new subgroup, S30
Partridge, J. E., S59
Pasteuria penetrans, endoparasite of nematodes, in soil, S117
Pataky, J. K., S25, S53, S59
Pate, M. C., S59
Pathogen
—introduced species, risk and epidemiology, S106
—invasion potential, predictive methods, S106
—invasive species, executive order, S106 Patil, M. A., S59
Patil, M. A., S59
Patocchi, A., S109
Patterson, C. D., S48
Paulus, A. O., S120
Pavek, J. J., S118
Payan, L. A., S123
Payne, G. A., S56, S107
Payton, M., S57
Pea
—defense gene regulation, correlation with high mobility group proteins, S42
—rhizosphere, microbial ecology and *Burkholderia vietnamiensis,* S41
—root rot, PCR assay for detection of pathogen, 1137
Peach
—constriction canker, management strategies, S44
—fruit rot, latent infection in Georgia, S126
—mosaic symptoms, new icosahedral virus, S49
—rust, symptoms, S121
—rusty spot, epidemiology and management, S26
Peachy, E., S36, S61
Peanut
—aflatoxin, harvesting effect, S8
—*Groundnut rosette virus,* sequence diversity in agents, 214
—leaf spot, chlorothalonil applications, cultivar response, S125
—soilborne fungi, two communities, S41
Pear, fire blight:
—biocontrol strategies, S101
—control with viral EPS-depolymerase, 1263
—environmental factors, 1285
Pearl millet, fungal and mycotoxin contamination, S129
Pecan, scab, spray advisories, S9
Pecci, M. P. G., S40
Pedersen, W. L., S3, S44, S54
Peever, T. L., 376, 407, 762
Pelargonium spp., bacterial pathogens, amplification competence, S28
Peltaster fructicola, on apple, temperature and relative humidity effect, 362
Peñaloza-Vázquez, A., S41, S59, S81
Peng, G., S59
Penicillium spp.
—*P. digitatum: Verticillium lecanii* interaction, antibiosis and host defense reactions, 932; *Verticillium lecanii,* interaction, cover photo, September
—*P. oxalicum,* resistance in tomato induced by, against Fusarium wilt, 260
—*P. expansum,* polygalacturonase, gene cloning and analysis, S87
Penmetsa, R. V., S79
Pennisetum glaucum, striga resistance, gene pool, 1169
Pepper
—*Phytophthora capsici,* soil core sampling data, S23
—powdery mildew, control, S12
Peralta, E. L., S124
Percich, J. A., S22
Percifield, R. J., S60
Pereira, R. M., S58
Pereyra, S. A., S60
Perez, E., S92
Perna, N., S92
Pernezny, K., S60
Peronospora spp.
—*P. parasitica:* on *Arabidopsis,* resistance signaling, oxygen, S134; on *Arabidopsis,*

riboflavin role, 801
—*P. tabacina:* root interaction, S126; on tobacco, population studies, S75
Perry, C. V., S60
Perry, K. L., 615, 1043, 1068, S55
Pesticide, spray drift deposition, non-target plant implication, S106
Peters, D., 454
Peterson, D. A., S53, S71
Peterson, G. L., 951, S25, S60, S131
Peterson, L. G., S128
Pethybridge, S. J., S60, S61
Petit, E., S27
Pfeiffer, T., S31
Pfender, W. F., S61
Phaeoacremonium spp., mycelial growth and survival, temperature and water effect, S84
Phaeoisariopsis griseola, on bean, molecular markers for subgroup, S49
Phaeosphaeria nodorum, on wheat, neural network classification in field environment, 108
Phakopsora spp., on soybean, detection using PCR, S25
Phanerochaete chrysosporium, wood decay, plasma membrane characterization, S62
Phaseolus vulgaris (see also Bean)
—anthracnose, resistance gene and molecular markers, 758
—white mold, fungicide evaluation, S24
Phatak, S. C., S129
Phialophora gregata
—phenotypic variation, S37
—on soybean: DNA fingerprinting, S52; genotype and molecular marker, 875
Philion, V., 31
Phipps, P. M., S132
Phoma spp.
—*P. ligulicola,* on pyrethrum, yield and site factors, Australia, S61
—*P. macdonaldii:* on sunflower, cotyledon petioles, cover photo, August; on sunflower seedlings, mode of penetration, ultrastructure, 915
Phomopsis viticola, on grape, berry and rachis susceptibility, S21
Phytomonas spp., plant parasites, ectophosphatase activities, 1032
Phytophthora spp.: on almond, resistance, S10; on citrus, root weevil complex, S30; diagnostic kits, evaluation, S34; genome, bioinformatics model, S109; recovery in irrigation water, factors, S127; zoospores, encystment factors, S13; zoospores in irrigation water, S81
—*P. capsici:* on bell pepper, inoculum dispersal, in soil, 148; on cucurbits, mefenoxam insensitivity, 396; Ridomil Gold sensitivity, in Florida, S122; on squash, disease management strategy, S119; on tomato, age and variety, S65; zoospore encystment, peptide effects, S7
—*P. cinnamomi:* on *Byrsonima crassifolia,* in Mexico, S85; composted animal manure effect, potting mixes, 775; on highbush blueberry, resistance, S73; on oak, lesion growth, S76
—*P. citrophthora, P. parasitica* comparison, growth media for, S118
—*P. infestans:* dimethomorph in a control program, S74; genotypic diversity, population analysis, factors, S31; Ireland population, characterization, S12; on maize, in Maine, S31; mating-regulated cDNAs, S119; mating type, oospores, fungicide formulations, 1201; migrations, world populations, S94; mitochondrial DNA, 19th century herbarium specimens, S65; on potato, field competitive fitness, 220; on potato, host diversity and inoculum pattern, 1307; on potato, oospore production and sprinkler irrigation, 1105; resistance in diploid hybrid of *Solanum,* S63; self-fertility, genetic factors, 987; from *Solanum berthaultii,* new R-genes, S68; sporangial survival, solar radiation, 78; on tomato and potato, detection methods, 1112; on tomato and potato, diversity in North Carolina, S82; on tomato and potato, genetic structure, temporal and spatial patterns, 1188; on tomato, resistance genes, S25; on tomato, specialization evolution, S73; on wild potato, novel population in Ecuador, 197; on wild potato, population in Mexico, S31; on wild *Solanum* spp., isolate characterization, S19; zoospore population, virulence, S1
—*P. nicotianae: P. cactorum* hybrid, molecular characterization, 867; sporangium production, herbicide effect, S36; on tomato, cabbage amendment and temperature effects, 1089
—*P. parasitica:* suppression in peat, aluminum, S23; on vinca, azoxystrobin for control, S32
—*P. phaseoli:* on lima bean, fungicides, S131; on lima bean, race profile, S131; race E, on lima bean, resistance, S132
—*P. sojae:* isozyme variation, cellulose acetate electrophoresis, S18; nematode relation on soybean, S85; new races in South Dakota, S13; *Rps* genes, S93; on soybean, pathogenesis-related proteins, S48;on soybean, resistance, S27; on soybean, tillage effect, S15
Phytoplasma
—on alfalfa, molecular detection, from Oman, 928
—clover phyllody and Cirsium yellows, strain diversity, S39
—host concentration, polymerase chain reaction, 1145
—mulberry dwarf, in leafhopper genital organs and eggs, 909
—Rhus yellows, characterization, S76
Phytotoxins, *Colletotrichum dematium,* on mulberry leaves, 285
Piccinni, G., S120
Piche, Y., S73
Pickens, J. B., S10
Pierce, M. L., S59
Piercey-Normore, M. D., S133
Pierson III, L. S., S7, S66
Pike, S. M., S61
Pimentel, G., 376
Pine
—disease management, S104
—fusiform rust, molecular approach, S104
—loblolly: fusiform rust, anatomical response, S129; rhizobacteria and ozone response, S22
—longleaf, root disease and insects, S127
—seed health, S104
—southern, fusiform rust, past and prognosis, S98
Pineapple
—mealybug wilt, a virus?, S92
—mealybug wilt, symptom induction, S71
—mealybug wilt-associated virus-2, genome organization, S52
Pinner, M. S., S9
Pinus spp.: diseases in Uganda, S67; root system, histology, S81
—*P. elliottii,* fusiform rust, resistance components, 1005
—*P. monticola,* rust, population diversity, 1073
—*P. pungens,* ectomycorrhizae, S21
—*P. strobus,* ectomycorrhizal fungi, reclaimed surface mines, soil properties, S44
Pistachio
—*Alternaria* spp., molecular characterization, S62
—*Fusicoccum,* in California, S73
Pitrat, M., 636
Pitz, K. Y., S27
Plantegenest, M., 860
Plaskowitz, J., 699
Plasmodiophora brassica, resting spores, detection in soil, S76
Plasmopara viticola, on grape
—heterothallism, S85
—sporulation factors, S67
Plattner, R. D., S4, S96
Pleospora papaveracea
—biocontrol agent for *Fusarium* on poppy, 812
—mycoherbicide for poppy diseases, 691
—on *Papaver somniferum,* cover photo, July
—on poppy, infection and disease, 699
Plum, bacterial spot, in Idaho and Oregon, S120
Plum pox virus
—coat protein, sequence analysis, S132
—Pennsylvania strain, characterization, S46
Plunkett, G., III, S92
Plyler, T. R., S110
Pnini-Cohen, S., 297
Podila, G. K., S5, S75, S88
Podolsky, R., 38
Podosphaera clandestina, on sweet cherry, fungicide management, S31
Poinsettia
—Pythium root rot, biocontrol with composted swine manure, S36
—root rot, biocontrol agents, S30
Polashock, J. J., S27
Polek, M., S72
Polston, J. E., S25, S123, S128
Polymyxa graminis, detection by serology, 537
Poplar
—pathosystems, variation, S105
—Septoria canker, resistance assays, S83
—transgenic hybrids, disease resistance, S12
Populus spp., bronze leaf disease, etiology, S73
—*P. deltoides,* leaf rust, resistance and molecular markers, 1039
Porat, R., S20
Porchas, M., S49
Pordon, M., S93
Porter, P. M., S14
Portetelle, D., S92
Posfai, G., S92
Postharvest pathology
—*Botrytis cinerea* on carrot, resistance induced in storage, 981
—fruit, biocontrol mechanisms: and methods, 1196; plate insert method, S39
Postma, J., 125
Potato
—*Arabidopsis* thaumatin-like protein 1, resistance, S117
—brown rot, bacterial survival in soils, 1358
—cropping systems, soil microbial communities, in Maine, S45
—cyst nematode, infestation foci, 647
—late blight: field competitive fitness, 220; genetics and spatial patterns, 1188; host diversity and inoculum pattern, 1307; inoculum sources, S50; oospore production and sprinkler irrigation, 1105; resistance in transgenic varieties, S20
—scab: actinomycetes in Australia, S44; resistance and tolerance to thaxtomin A, S48; *Streptomyces* in Korea, S42
—*Tobacco rattle virus,* detection using polymerase chain reaction assay, 448
—Verticillium wilt, corn and barley rotation, S118
—Verticillium wilt and scab, ammonium lignosulfonate for control, S73
—virus resistance, S118
Potato leafroll virus
—aphid acquisition and cell transport, P5 readthrough protein, 1153
—potato spindle tuber viroid mixture, interaction, S75
—systemic infection, movement protein requirement, S45

Potato mop top virus, detection, polymerase chain reaction assay, 448
Potato virus V, genomes from Europe, molecular characterization, 437
Potato virus X
—antimicrobial expression cassette, S88
—in *Ipomoea nil, Sweet potato feathery mottle virus* role in spread, 944
Poupet, A., 522
Powell, C. A., S61
Powell, W. A., S12, S46, S105
Powelson, M. L., S36, S61
Powers, Jr., H. R., S98
Pozdnyakova, L., S103
Prairie, green leaf biomass and leaf litter, in Iowa, S60
Prasad, S., S61
Pratt, R. G., S61
Preston, G. M., S59
Pretorius, Z. A., 1026
Prins, M., 183, 454
Proctor, R. H., S96
Prom, L. K., 1079
Prune, French, bacterial canker, rootstock effect, S69
Prune dwarf virus, detection with molecular hybridization and polymerase chain reaction, 1330
Prunus necrotic ringspot virus
—in Australian hop gardens, S60
—detection with molecular hybridization and polymerase chain reaction, 1330
—on rose, detection methods, 522
Prusky, D., 553, 1256
Pryor, B. M., S62
Pseudomonas spp., biocontrol activity, S19
—*P. aeruginosa,* ryegrass blast controlled by, factors, S80
—*P. aureofaciens:* biofungicide characterization, phenazine production, S66; phenazine biosynthesis, regulation, S7; on turfgrass, field evaluation, S33
—*P. putida:* biocontrol using irrigation water, S74; Rhizoctonia root rot of apple controlled by, carbon effect, S31
—*P. syringae:* alginate production, plasmid mutagenesis, S23; amended names, letter to editor, 208; on *Arabidopsis,* genetic analysis, S47; on *Arabidopsis,* resistance signaling, oxygen, S134; on *Arabidopsis,* riboflavin role, 801; biocontrol agent for barley basal kernel blight, 368; on cantaloupe, host range and genetic diversity, in France, 636; coronatine biosynthesis, regulation, S81; coronatine, histidine protein kinase, S63; coronatine-producing strains, detection, S88; effector loci, analysis, S64; genomic approach, S108; host range, Hrp type III protein secretion, S24; *hrp/hrc* gene clusters, analysis, S63; phytotoxins, genetic map, S70; on rappini, delayed replanting factor in California, S15; regulatory genes, syringomycin production, S48; resistance gene functions, genomic dissection, S110; tabtoxin-producing strains, detection, S48; on tomato, alginate biosynthesis, Hrp system and copper, S41; on tomato, effector locus, S4; on tomato, incidence in North Carolina, S47; on tomato, protein secretion system and coronatine biosynthesis, S59; on tomato, R gene pathway, S86; on tomato, specific determinants, S76
—*P. tolaasii,* on mushroom, PCR detection, S13
Puccinia spp.
—*P. graminis:* on grasses, modeling latent period, S61; on wheat, avirulence genes, DNA markers, 819
—*P. hordei,* on barley, resistance genes, 1131
—*P. jaceae:* on safflower, teliospore as inoculum, S10; yellow starthistle controlled by, genetic variation, S87
—*P. recondita,* on wheat, virulence diversity, populations in Israel, 601
—*P. sorghi,* on sweet corn, Rp genes, S59
—*P. striiformis,* on wheat, plant density and cultivar effect, 1313
—*P. substriata,* on pearl millet, multiline strategy for management, S84
—*P. triticina,* on wheat, virulence and molecular polymorphism in international collections, 427
Puckhaber, L. S., 248
Puhler, A., S92
Punja, Z. K., S120
Purcifull, D. E., S126
Purvis, A., S130
Pusey, P. L., 1352
Putievsky, E., 710
Pyrenophora tritici-repentis
—ascospore production, conditions, S25
—races, host selective toxins, S2
—on wheat, neural network classification in field environment, 108
Pyricularia grisea
—on bentgrass and bluegrass, pathogenicity, S78
—genetic and molecular markers, characterization in USA, 1396
—on rice: molecular and cytological studies, S55; variability in Bhutan, 621
—on ryegrass and tall fescue, management factors, S79
Pyrowolakis, A., S62, S120
Pyrus pylifolia, scab, infection behavior, 1209
Pythium spp., *Phytophthora* compared to, protein gene sequence, S87
—*P. aphanidermatum:* on cucumber, microflora effect on disease, 125; on turfgrass, fungicide application strategies, S59
—*P. arrhenomanes,* on sweet corn, herbicide effect, S36
—*P. ultimum:* on cucumber seedlings, seed treatment, cover photo, January; disease progression and biocontrol, rhizobox system, 1049

Uncinula necator
—azoxystrobin and myclobutanil sensitivity, S85
—on grape: berry infection, S24; control, S45; rot and wine quality effect, S26
Undersander, D. J., 657
Upchurch, R. G., S79
Uphoff, M. D., S86
Urban plant pathology
—diagnosis, prevention, and control, S106
—monument trees, S106
—salt and air pollution, tree symptoms, S107
—trees and sites, S106
Ureña-Padilla, A., S79
Uribe, P., S79
Urrutia, T., 1246
Urs, R. R., S65, S122, S124
Usall, J., S58
Ustilago spp.
—*U. hordei*, mating pheromones, inhibition mechanism, S43
—*U. maydis:* dimorphic phase, differential genes, S28; dimorphism and pathogenicity, protein phosphatase 2B, S126
—*U. nuda*, on barley, carboxin resistance, 179
Ustun, N., S79

Vaccinium corymbosum, Alternaria fruit rot, epidemiology in Pacific Northwest, S117

Venter, M., S80
Venturia spp.
—*V. inaequalis:* on apple, biocontrol, 31; on apple, potato *gst*1 promoter, S65; drug efflux pumps, characterization, S70; on *Malus* sp., races 6 and 7, host-pathogen genetics, 236; oxidase gene, characterization, S70
—*V. nashicola*, on Asian pear: cover photo; infection behavior, 1209
Vera, C. Cruz, S4
Verdier, V., 683, S64
Verticillium spp.
—*V. dahliae:* on cauliflower, broccoli-mediated reduction, mechanism, 305; on cauliflower, irrigation effect, 995; on lettuce, seedborne, S7; on pepper, in California, S7; on peppermint, varietal interaction, S118; on potato, distribution in Pacific Northwest, S57; on potato, lesion nematode and rotation crop effect, S44; on potato, *Pratylenchus penetrans* synergism, S67; in soil, control by organic amendments and tarping, 253; swine manure effect, factors, S16; on tomato, cropping practice effect, in Ontario, 1011; vegetative compatibility groups, in Israel, 529; on woody ornamentals, vegetative compatibility groups, S29
—*V. fungicola*, on mushroom, population variation, S16
—*V. lecanii, Penicillium digitatum* interaction, antibiosis and host defense reactions, 932
Vesonder, R. F., S1, S50, S80
Vianna, M. G. R., S23
Vicia faba, chocolate spot, wyeronic acid synthesis, S55

Viola × *wittrockiana, Thielaviopsis basicola* on roots, penetration and infection, ultrastructure, 843
Virology
—detection, PCR-based group tests, S49
—vector virus transmission mechanism, disease epidemics, 576
Viruses
—begomoviruses: characterization in Puerto Rico and Caribbean region, S122; detection, techniques in Cuba, S124; new in Brazil, S10
—bipartite, genomic size constraints, cell-to-cell movement, S75
—closterovirus, genetic diversity and evolution, S92; RNA genomic model, S108
—detection, molecular beacon approach, 269
—dsRNA based diagnosis, enhancements, S45
—helper, mathematical models, complexes, 85
—multiple resistance, transgenes and virus segments, S112
—negative-strand RNA, cap-snatching, S111
—potyvirus helper, protease gene, symptoms and protection against other viruses, 467
—RNA mediated defense, S112
—tobamovirus, thermal stability of particles, S52
—transcriptional gene silencing, plant suppressor, S127
—viral suppressor by mobile silencing signal, S127

Wheat
—anti-*Fusarium* protein gene, S57
—*Aspergillus flavus* on seeds of, flooding effect, S43
—bacterial seed treatments, in Virginia, S133
—bird-cherry oat aphid, plant response, S57
—diseases, foliar fungicides in Alabama, S11
—dwarf bunt, population variation, 376
—*Fusarium graminearum,* deoxynivalenol tolerance, S4
—Fusarium head blight: antagonists, field testing, S69; biocontrol, factors, S42; risk assessment model, S19
—*Fusarium* spp., deoxynivalenol and nivalenol biosynthesis, S54
—head blight, situation in Iran, 103
—High Plains Disease, ribonucleoprotein complexes, S53
—Karnal bunt: molecular identification of species, S48; species differentiation using PCR, 951; susceptibility, S60
—leaf rust: genetic vulnerability, S81; international collection, molecular polymorphism in virulence, 427; resistance sources, S88; virulence diversity and populations, in Israel, 601
—*Magnaporthe grisea,* wheat and millet isolate crosses, host specificity, 1060
—powdery mildew: oil for prevention, S69; spore efficacy and host genetics, 1300
—rhizosphere community, methyl ester profiles, S19
—rose grain aphid, predators, interactions with pesticide, S77
—seedling pathogens in Mississippi, S122
—*Septoria tritici* blotch: fluquinconazole translocation effect, 1345; interaction using β-glucuronidase, 297
—speckled snow mold, resistance screening, S119
—stem rust, avirulence genes, DNA markers, gene nomenclature, 819
—stripe rust: durable resistance and trait loci, molecular mapping, S14; plant density and cultivars, 1313
—take-all: manganese effect, S77; prevalence in Pacific Northwest, S63; silthiopham seed treatment, S33
—tan spot and leaf blotch, infection period models, forecasting system, S19
—tan spot and Stagonospora blotch, neural network classification, field environment, 108
—yellow head disease, in Kansas, S70
Wheat streak mosaic virus
—nucleotide substitution, accumulation, S33
—RNA viral gene, S25
